

STEAM BOILER PROTECTION

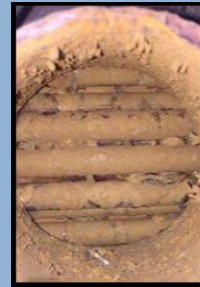

www.hydroflow-usa.com

Full Steam Boiler Protection

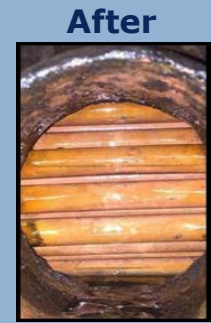

A full boiler treatment solution which allows operators to discontinue or greatly reduce the use of a water softener and antiscalant.

This solution utilizes the industrial-grade *HydroFLOW* i range water conditioner as well as the light commercial s38 and hs40 water conditioners.

The combined use of these devices increases the boiler's efficiency by preventing scale accumulation and removing existing scale deposits.

Before

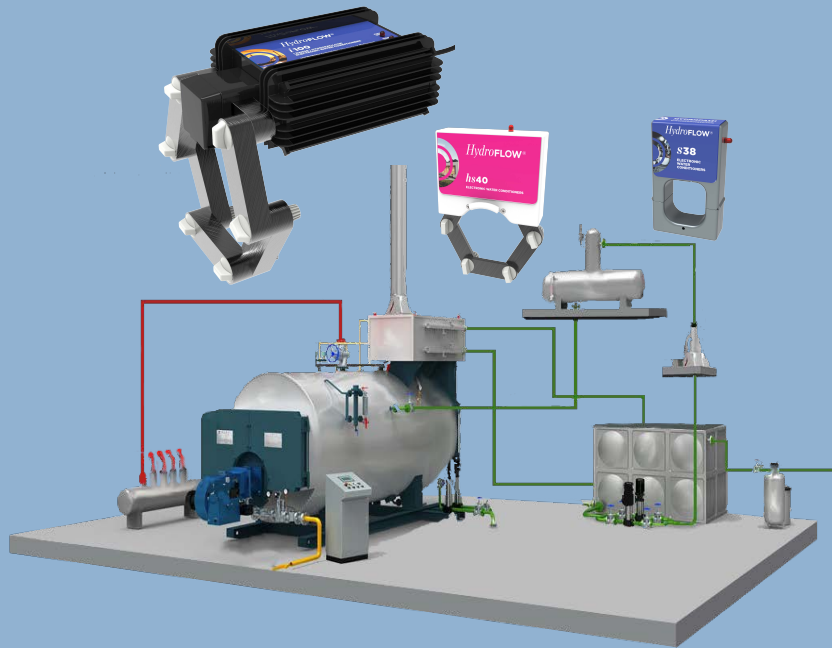

After

Partial Steam Boiler Protection

A partial boiler treatment solution for operators who are not interested in discontinuing the use of a water softener and antiscalant, but looking to further optimize their system.

This lower cost solution utilizes the light commercial s38 and hs40 water conditioners and is meant to assist in the reduction of hard scale accumulation.

FROM COMBI BOILERS TO COOLING TOWERS

HydroFLOW units are installed all over the world in a wide variety of applications and industries to treat scaling and filtration issues. Check out our website for more information: www.hydroflow-usa.com
